

Appl. No. 10/600,566
In re HUSSAINI, et al.
Reply to Office Action of June 28, 2007

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1 and 2 (canceled)

Claim 3 (currently amended): A portable video display unit comprising:

a base member adapted for removably attaching said video display unit to an electronic video processing device, said base member including a base panel and a mounting member positively engaging a front side of said electronic video processing device; and

a video display member including a viewing surface provided with a display screen, said video display member pivotally mounted to said base member for pivoting between a stowed position wherein said video display member is substantially parallel to said base panel and a deployed position wherein said video display member projects outwardly from said base panel with said display screen in a disposition which is viewable by a user of said electronic video processing device;

~~wherein~~ said base member ~~includes~~ including a locking attachment device provided for removably securing said video display unit to said electronic video processing device, ~~and~~

~~wherein~~ said locking attachment device ~~includes~~ including a locking tab pivotably mounted to a rear side of said base member, said locking tab including:

a projection provided for engaging a recess formed in a rear side of said electronic video processing device, and

a movable locking member to selectively prevent rotation of said locking tab relative to said base member to maintain engagement between said projection and said recess.

Claim 4 (original): The portable video display unit according to claim 3, wherein movable locking member includes a hook member slidably mounted to said locking tab between a first position and a second position, wherein when in said first position said hook member may be freely and removably inserted within an opening in said base member and when in said second position engages said base member to prevent relative rotation thereto.

Claim 5 (previously presented): The portable video display unit as defined in claim 4, wherein said electronic video processing device includes a casing having opposite side faces, a front face and a rear face, said front face provided with at least one substantially horizontally extending groove.

Claim 6 (currently amended): The portable video display unit as defined in claim 5, further comprising a mounting rib disposed adjacent to a front edge of ~~[[the]]~~ said base member engaging one of said at least one groove of said front face of said casing of said video game console, and wherein said at least one locking tab engages said rear face of said casing of said video game console.

Claim 7 (original): The portable video display unit as defined in claim 6, said at least one locking tab is rotatable in a plane substantially perpendicular to said rear panel of said base member.

Claim 8 (original): The portable video display unit as defined in claim 6, including two locking tabs each rotatable in a plane substantially parallel to said rear panel of said base member.

Claim 9 (previously presented): The portable video display unit as defined in claim 3, wherein said base panel is substantially flat and said base member includes a screen support member extending upward from said base panel adjacent to a rear edge thereof, said video display member being pivotally mounted to said screen support member.

Claim 10 (original): The portable video display unit as defined in claim 9, wherein said screen support member has a front panel provided with a power switch and a plurality of controls for regulating said display screen.

Claim 11 (original): The portable video display unit as defined in claim 10, wherein said front panel is further provided with at least one earphone plug socket.

Claim 12 (original): The portable video display unit as defined in claim 9, wherein said screen support member has a rear panel provided with at least one electrical connector adapted to be detachably electrically connected to a corresponding electrical connector on said electronic video processing device through an extension cable.

Claim 13 (previously presented): The portable video display unit as defined in claim 3, wherein said video display member is further provided with a pair of stereophonic loudspeakers.

Claim 14 (previously presented): The portable video display unit as defined in claim 3, further comprising a display controller for electrically connecting said video display unit to said electronic video processing device.
